

Clausius's work.

The Journal de Physique is about the
best you could get. It contains (Vols 6-8)
Marsaut's beautiful papers on Dynamio-
Machines.

You ought really to get these.

Coopers Hill, Staines.

Φ, 10/12 19th Apr.

See Nature this week, p. 576,
first paragraph on this page. Telephoto!
how like Telephotograph!! I really
have no more time to lose. I must
publish my exp^{ts} to Physical Society.
I have written to Airy to ask Stroy
an exp^t with a telescope on planet
or star light. I must get the idea
out first, at any rate.

I have been working like a black
at the Energy question & have got
to Chap. VI. I had desired greatly
to show it to you; but I shall send the

MS by post.

I have a difficulty in the theory of a body moving & the sudden fixing of an axis wh. I shall send you when I have a little more time.

+ I mean to send a short paper at once to London Math. Society on the expressions for Moment of Momentum of a Rigid Body & its Energy of Viscous motion.

In the motion of a body round a point, can you express easily the direction & magnitude of the absolute acceleration of a point in it? I find it rather simply by Quaternions. Try.

With at once.

M.

GET the (recent) translation of Clausius's Theory of Heat by W. R. Browne. It is exceedingly good - better than 1st ed. of
