

10/68

Coopers Hill, Staines.

Nov. 19.

Φ ,

I hereby send you the M.S. of Chaps
I + II. I have left room for examples,
etc., some of wh. I have ready but not
quite in order. The scheme wd be
something like this:—

Chap. I.

Displacement & Velocity.

Chap. II.

Acceleration.

Chap. III.

General Theorem of Epicycloidal Motion.

{ Planimeters, Theorems of Holditch, Kempe, &c. }

Chap. IV.

Special Roulette Theorems.

Chap. V.

Mass-Kinematics of a Rigid System.

Chap. VI.

Kinematics of Strain & of Fluids.

(today)

I have written to the Clarendon Press
offering the book.

You are to cut in everywhere you think
fit with examples, new paragraphs, &c.,
besides at once attacking Chaps 5 & 6.
All the rest is pretty well done, except
so far as writing out for Press is
concerned.

I have registered the M.S. for
safety. Read it over & let me
have your opinions, &c.

In great haste. Acknowledg
Receipt.

M.
