July 14<sup>th</sup> 1892

Dear George

I am glad to see  
your worthy name as  
Pres. of Physical Society  
No doubt you will be of  
use there.

I send my whack at  
the Dissociationists.

I have at present some  
very nice work with  
cells with fused electrolytes  
like

They correspond very well  
with Thomson's law - You  
see the solvent & its complica-  
tions are left out.

There are some interesting  
points coming out of a  
smaller order in passing.

If you know of any  
word with such cells  
before I should like  
to hear of it.

I hope all are well,

Yours very faithfully

J Brown
