Dear Professor Fitzgerald

I write to ask
you whether you can
give me permission
to carry out some
research work in
your laboratory at
Trinity College. I
wish to investigate

the electrostatic
deflection of cathode
rays, as lately
discovered by Jaumann,
and believe that
I could only successfully
do so in your
laboratory and with
the occasional help
of your valuable
advice.

I am not

acquainted with the
rules or facilities
for research in your
laboratory, or the
most convenient
time for research
work, and should
be very thankful for
some information
on these points. 17/29

Yours very truly

E. S. Fournier-d'Albe
