Dear Sir

I am much obliged to
you for your letter of the
28th Feb. The angle between
the two roads was $2 \times 37^\circ$, i.e.
less than $2 \times 41^\circ$ - the maximum
angle mentioned by you. The
suggestion you make is ex-
tremely ingenious. One
fact I am quite certain
about is that the 'roads'
were & for more than an
hour remained perfectly
straight.
