

2/40

I wish indeed you had
been at N'castle to
live us up & to
give us more about cobweb
ether or to draw more from
W.T. on the subject.

Fancy you wasting 25 good
sheets on Rendond! He
is hopeless but his nonsense
unfortunately does ~~not~~ disturb

no discredit to a large
number of British Engravers.

There are people who think
similarly & the great
bulk of them are ignorant
& which many pride themselves
upon the fact. Hence I

think Rendond is doing
service by his outspoken
representation of the work
which is current; & if corrected
the correction should be public.

Your favour, both letter is
very nice. I am sorry you
doubt my models so much
but am not altogether surprised.

I don't feel of haste after
except as a step ^{of better than nothing}
thoroughly. & I feel the
force of most of your remarks.

I don't understand why you say
I mix up mechanical & electric
force though. None of my
models show mechanical force

that I remember.

I Liverpool never on your way from Dublin to
London? We would awfully like to put you
up. Yours much
JH

Prof Lodge

21, WAVERLEY ROAD,
LIVERPOOL.

My dear FitzGerald

I forget if I told you that
the B.A. knocked me up &
I am only getting right again
now.

You mistake about Browns 1 of
it was included in the

5.16. — you sent me.
& in the apt receipt sent
in.

The paper was sent
as a voucher. Everything is
square to date.
