My dear Fitzgerald,

I enclose you
Pascheu's reply to my letter
in which I sent him on
yours. Will you kindly
return it to me, or keep
it until we meet. I had
a short talk with Boyo
today, about the best

form of duplex radio-micrometer
for experiments on solar
radiation. I think we could
construct it to be perfectly
dead beat. And also capable
of being transported without
fear of breakage. Boys has
kindly offered to think over
the details for me.

Yours very sincerely
W E Wilson
