April 14th 1894

Dear Prof. Fitzgerald,

I enclose the two suggested papers in Mechanics for Entrance in Arts (June and September). The usual course is for the External Examiner to revise them and return them to the Internal Examiner after signing them. The latter then forwards them to the Registrar.

The September paper is usually a little easier than that set in June.

Both papers will be submitted to the Departmental Board in due course, when Profs. Core and Stroud will have an opportunity of suggesting any alterations in the questions; this is generally a mere matter of form with us, though I believe in some subjects it leads to discussion - more

especially in Mathematics.

After the Examination the papers come to me. I look over them & then forward them to you with the mark sheets.

We both sign the mark-sheets & I send them to the Registrar.

Yours sincerely,
James L. Howard.
