Dear Prof. Fitzgerald,
The Editors of the Electrical
Review are publishing a Jubilee
Number in November. They ask
me to write an article on
"Developments of experimental
Physics during the past 25
years". I want to include
some account of your work.
Would you kindly oblige me
with a short note giving
your most important results.

I should also be glad of your opinion as to what are the principal developments in experimental physics during the $\frac{1}{4}$ century. Unfortunately I have only been given about a week for preparation of this article. With apologies for thus troubling you.

Yours very truly,
Rollo Appleyard.
