

wished me - I will throw the
papers into the form of a
Report. and perhaps say
a word or two introductory

Most sincerely yours

Wm Tyndale

Success to the Memoirs!

27/16 Lucan road 17th Oct. 1852.

My dear Frances.

I want you to do two favours

for me:

No 1. To send me Ann. de. Chim. et
de Phys. 56. At page 371 there
is an account of Peltier's experiment,
which I want to see

No 2. To send me Pogg. 44. At
page 342 there is an account of
a repetition of Peltier's experiment
by Sawz.

I will return them to you without delay.

I have already a good many nos. besides

one but I am just waiting to get

them with the subject to which

they refer; when this is accomplished
I will send them to you at once.

I intended yesterday to
inquire whether you would think
it well to publish a reply to Adair
on his side with his remarks
in the next No. but as this full
of thereby may remain over.

I have already sent one paper
in to the Royal Society, I hope that
it will appear in the next vol.
of the Transactions.

Bacon Jones has written to me
to enquire whether I could be

induced to undertake the
translation of the Physis of Leibniz
Benecht. I shall probably do a
small paper on it. He also of
has kindly mentioned me as likely
to deliver a good course of lectures; and
asks me whether I ~~should~~ would not
undertake to deliver one some
Friday week before or after Easter -
I have sent in an affirmative reply.
So that after Christmas I shall hold
both same evening.

Write pt Helmholtz ready,
but the of the number has not
