

27/19

c. Oct 30 1852

My dear Francis, *Jordan*,

I have adopted
your plan for the first time
and got along to write for me.
I hope the printers will be
able to manage it - I have
gone over every page carefully
and made all necessary
corrections - This I think
perfectly legible although
possessing a harum scaram
appearance. True Helmholtz

never to do any thing else
his name will be remembered
in connexion with these two
papers.

are yours

Spindley

~~I will send you~~
~~Spindley~~ I will now turn
my thoughts on a
paper for the Museum.

- Thanks for Qualey's
letter. My Pluck has
not sunk the fraction
of a degree - will
soon return the letter.
I am fear he stands a
perilous chance of not
being found among the
private favours at the
last day!
