

27/22

Dec 15, 1852

My dear Francis.

I send you Reich's
paper - Dealing as it does with
experiments which occur very rarely
and which interest every
body it would not be well
to omit it.

I send you also a
condensation of Martmann -
I would let it all go in one
article much drawing a
line as I have done between
the two papers. One word

I cannot translate it is
accordise at page 6 of
the translation.

I shall probably take
a run up to you soon

very yours

Syndall

15th Dec.

I send you a review of
Purslo's work. Such books,
I think, might be permitted
to die without notice.
