

27/28

March 53

My dear Francis

I have a full

packet inscribed to you if
on receiving this you would
send a copy to the Royal
Society with the enclosed
note for Donald - to be
opened by Mr White if he
is absent. It is to borrow
Mackenzie's travels in
Iceland. and when you

You received I should feel
doubtless delighted by it if
you would send it to
me by post a rail on ^{40, 101} ^{per} ^{Rail}
the same day - ^{March 22/53} I must
have it by Wednesday,
as I go to London Thursday
and my object is to
leave the ~~book~~ book with
a person here who is

going to copy some of the
drawings for me.

Think the paper of
L'Association Scientifique de
Chim. [3] XXXIII. 391
would form a very
suitable subject for the
Scientific Memoirs. If you
would let it translated
I should be happy to publish
in the Ephemeris.

ever yours
Thomson
