Dear Prof. Fitzgerald

Sollas is actually
on the wing!! Dr. Haughton
tells me the appointment
will be made in June to
fill the chair in T.C.D.
He thinks I am very safe
of it - but I am sending
lists of my geological papers
to Peery-weerys with
big names.

I enclose such a list, together
with a manifesto to my
constituents - not yet issued -
I don't understand Chasagne's

Method. If he stains the negative it must be the silver takes up the stain - This is opaque - If he now prints from this the Colours will be wretched.

[as they are, however.]

I had a letter from Abney saying he showed one lined plate 20' in diam. at Crystal Palace and the photo were received with great applause - far more than expected Mes, Bennett, & Chassigne. Lines were invisible at 20'.

Ever yours very sincerely

J. Joly.
