Dear Professor Fitzgerald

I am sending up by
special messenger the Magnetometer,
& Dip Circle for Valentia with
the tripod stand. The instruments
are carefully packed & with
ordinarily careful treatment should
travel safely. Unfortunately
one of the thermometers was broken
here & we have not had time as
yet to replace it. A new thermo-
meter however has been ordered
& we shall send it direct to

Valentia, in a week or so;
of course it is but a secondary
item.

Yours faithfully,
Charles Chace
Superintendent
