

6/58

THE YORKSHIRE COLLEGE,
LEEDS.

Oct 21. 84

My dear Fitzgerald-

I am very anxious to have the finish of my communication on the spectra of gases in the Phil. Mag. for December so that both parts may be in the same year. The second part will deal with the "carbon" spectrum & the spectra of some copper & gold compounds. But I shall want a map of spectra

6/58

engraving or photo-gravure in
black & white. I enclose a
reduced photo. of the thing for
your inspection - The maps are
hand drawn in crayon and will
I hope prove of permanent value.

It is perhaps scarcely right to
ask you to commit yourself to the
publication of my paper without
seeing Pt. II - but I want to get
the engraving in hand soon so

as to have it ready - Please say
where I should send the drawing -
I shall also want to publish
a line drawing of a lot of apparatus
I will send you the paper as
soon -

I saw Pringsheim at Oxford
& had several talks with him -
He is going to "chew me up" as
soon as I have published Pt. II.

Sincerely yours
A. H. Marwick
