3 wire system @ 900 volts

note

? E. Drayman's experience
240 volts. live car

2 cars voltage higher - nonconforming
to Board of Trade generally require
automatic breakers on cars.

Do you think automatic regulators
would be of any use to prevent the
accidents?

Ammeter sufficient for regulation?
Leakage test & ammeter at station?

What harm in leakage?

Revenue on fluctuating or voltages cut out
How high did trolley wires cause voltage?

Dear George

I enclose a cheque for
£36.5.0 which is half the
£72.10.0 I have received from
Uncle Frank for the interest on
Clare charges £2500 and £500,
less Income tax @ 18

I don't know whether you have
been to the B. Ass. I saw Larmor
a few days before the meeting
(he was stopping with Brown)
and he expected Eddie to be there

with some communication
about kinetic theory of gases
I think but wasn't sure about
you.

I had a letter the other day
from Joly wanting to know
if I might in any way have
communicated anything
about his process for coloured
photos to any American; I
could assure him that I
didn't - at any rate not in
the U.S. as I haven't been
there since '92. Anyway I
never knew what the process is

Joly said it involved a subdivided
picture by ruled plates - whatever
that may mean - its no informa-
tion to me, and I have not looked
up the patent.

We are all flourishing here
Thank you, hope you are the
same. Annie sends her love.
Give mine to Harriette and the
children

Your affectionate brother
Maurice F. Fitzgerald
George F. Fitzgerald
