

THE RECTORY

GARRICHTOWN

NEW YORK

9/45

Jan 21,

My dear Haddon

This morning I received full details concerning a most important revival of fish-curing which I have barely referred to in my report. I therefore send you a sheet commencing with I think the same words as a paragraph in my report coming in as well as I remember immediately before the section entitled "Bounties". I wish you could cut out said paragraph and insert the sheet I enclose in its place. Also I forgot to change "Diatoms" into "unicellular algae" in its Appendix A. Kindly make the change too. I fear Mr. K. is making a hash of our affair and that

9/45

Between two stools I may
get cut out of going on with
fish bank exploration I had
planned. I did not know
till the day before yesterday
that you were in for a R.I.A
Grant as I wrote to Mr
Keat once to cut ours
down to 40 if it should
at all clash with yours
I am awfully glad you have
got the 50 and if you are
going in again let me know
I am going to Dublin on I think
next Monday week and will

stay at Killiney with Rev
Mr. Day till the 2^d. I am
free to go to Dublin on the
1st and must try to have
a talk over the present
situation there.

Yours truly

W. S. Green

Jan 21. 88

I suppose the Good Report
is now in print I suppose
mine will come out so that
they will have time to alter
things and that I can be
charged with picking from them.

The sheet I was sent is very
important. I said very little
about baits. if admirably I could send an
appendix on the subject

The points concerning trends
were not noticed by
Huxley or any one
else no bar as
my reading
has gone

Appendix C
